Vellore, Tamil Nadu • +91 79045 86593 • pranav.x.saraavanan@gmail.com

SUMMARY

Mechatronics engineering student with hands-on experience in PLC programming, electrical panel building, and mechanical design across AutoCAD, Fusion 360, SolidWorks, and Autodesk Inventor. Practical robotics exposure through Robocon 2025 and an independently built Automated Guided Vehicle (AGV). Combines strong design and fabrication skills with a structured, detail-oriented approach to engineering problems.

EDUCATION

Bachelor of Engineering (B.E.), Mechatronics Engineering *Expected 2028*
Kumaraguru College of Technology, Coimbatore, Tamil Nadu

TECHNICAL SKILLS

CAD & Mechanical Design	AutoCAD, Fusion 360, SolidWorks, Autodesk Inventor
Automation / PLC	Delta WPLSoft — ladder logic, timers, SET/RST latch functions
Electrical Systems	Panel building, electrical hardware systems, wiring
Fabrication	Hands-on fabrication and prototyping

INTERNSHIP EXPERIENCE

PLC Programming & Design Intern *June 2026*
Suntech Energreen Private Limited — Arni, Tamil Nadu

- Completed a structured 208-hour internship spanning PLC programming, electrical panel building, and 3D design
- Developed and tested ladder logic programs using Delta WPLSoft under the guidance of the Engineering Technical Manager
- Assisted in electrical panel building and wiring for industrial control systems
- Applied CAD tools to mechanical design and 3D modeling tasks

PROJECTS

Robocon 2025 *Team Project*
National-level robotics competition

- Part of a team that designed and fabricated a competition robot — contributed to mechanical design and fabrication

AGV — Automated Guided Vehicle *Independent Project*

- Designed and built an AGV robot, applying mechanical design, fabrication, and automation know-how in a self-directed build
